Togeo Studios - Creating Music....

Togeo Studios. is a music creation, sound design resource center and community forum. TS provides music creation resources such as, audio loops and samples, midi files, VST instrument and effect presets, Ableton Live resources as well as information and forum support for electronic musicians.

It is also the home of the Togeo Music recording label started in October of 2007 by George and Tobias Peterson. The Togeo Music artists provide there music for free under a Creative Comons license, allowing the music to be shared and redistributed to their freinds as well as allowing the use of their tracks in videos, remix, mashups and presentations. The Togeo Music library is constantly growing and is inspired by the concept that music should be accessable and heard.

Thank you for trying out Togeo Studios products,
The staff at Togeo Studios.
